PRIVATE CUSTOMS WAREHOUSE**102752A****AUTHORIZED NC CODES****1507-1518 | 3823****ADM AMENDMENT****05.12.2022**

What the regime enables

- **Duty suspension while under the regime**

Non-Union goods may be stored under customs control without being subject to import duties and other relevant charges while placed under the special regime, subject to applicable rules.

- **Physical storage at the authorized site**

Goods placed under the regime must be physically introduced into the authorized premises.

- **Union and non-Union goods**

Common storage is permitted where goods remain physically distinguished and customs status is immediately identifiable.

Release, onward regime or re-dispatch

- **Release to the Union market**

Goods intended for the Union market are extracted after the required customs formalities.

- **Re-dispatch outside the EU**

The service specification provides for extraction for re-dispatch abroad through the applicable customs procedure.

- **Subsequent customs regime**

The warehouse regime may be discharged by placing goods under a subsequent customs procedure.

COMPLIANCE NOTE

Commercial summary of the uploaded ADM decision and service specification. It is not customs, tax or legal advice. Each proposed flow should be confirmed against current authorization conditions before execution.

02

How to qualify a customs-sensitive flow

01

Cargo

Product, NC code and commercial description.

02

Status

Union / non-Union status and origin.

03

Movement

Loading port, vessel/road mode and intended arrival.

04

Storage

Quantity, storage period and tank requirements.

05

Exit route

Union release, onward regime or re-dispatch.

06

Verification

Technical and customs feasibility confirmation.

AUTHORIZED PRODUCT PERIMETER

The 5 December 2022 amendment lists NC codes 1507 through 1518 and 3823, covering a broad range of vegetable oils, olive oils, tropical oils, modified fats and oils, margarine/fat preparations, industrial fatty acids, refining acid oils and industrial fatty alcohols.

Planning an import / storage / re-export flow?

Send product classification, origin, quantity, customs status and intended exit route for a preliminary feasibility review.
