01

Quality and control built into the operating model

01

Product segregation

Dedicated line and pump per product are stated in the current corporate presentation.

02

Tank monitoring

Electronic tank weight control supports stock visibility and operational monitoring.

03

Information handling

Client data are presented as being handled with maximum discretion.

- **Environment, health & safety focus**

The corporate presentation identifies environment, health and safety as an operating focus.

- **Video surveillance**

Internal and remote video surveillance is stated as part of the terminal security framework.

- **Perimeter alarm**

A perimeter alarm interfaced with the port authority is stated.

- **IBM AS400 GALILEO**

The corporate presentation identifies IBM AS400 GALILEO as the terminal data-management platform.

- **Electronic weight control**

Tank inventory is supported by electronic tank weight control.

- **Dedicated handling**

Dedicated line and pump by product support segregation and controlled product handling.

fatty acids / acid oils / fatty alcohols

- **Physical introduction of goods**

Goods placed under the private customs-warehouse regime must be physically introduced into the authorized premises.

- **Union / non-Union distinction**

Common storage is permitted where goods remain physically distinguished and customs status immediately identifiable.

- **Accessible customs supervision**

Goods and records must remain available for ordinary and extraordinary customs verification.

- **Warehouse records**

Records must enable identification of goods, customs status, location and movements.

- **Link to documentation**

Goods are to be identifiable against the relevant commercial, customs and administrative documentation.

- **Workplace safety**

The customs service specification explicitly requires compliance with Italian workplace-safety legislation.

CUSTOMER DUE DILIGENCE

Before confirming feasibility, Stock Sinergy requests product identity, customs classification where available, quantity, origin, temperature / heating requirements, segregation needs, storage period, customs status and relevant SDS / HACCP or quality requirements.
